The screenshot shows a complex data visualization setup in IBM Cognos Analytics. The main area features a 'Packed bubble' chart titled 'Branch, Payment and Rating colored by Total sized by Tax 5%'. The chart contains numerous bubbles of varying sizes and colors, representing different data series. A legend at the top left shows 'Tax 5% (Average)' with a slider from 0.6 to 49.26 and a color gradient from light purple to dark purple, corresponding to values 12.69 and 3,586.53 respectively. The chart is overlaid on a background image of a brain. To the left, there are three pinned reports: 'Branch, Paym...bubble chart', 'gross margin p...oice ID chart', and 'Invoice ID by ...City pie chart'. On the right, a 'Fields' panel lists the data dimensions and measures used in the chart, including 'Bubbles*' (a required field), 'Branch', 'Payment', 'Rating', 'Size' (set to 'Tax 5%'), 'Color' (set to 'Total'), and 'Repeat (column)'. The bottom of the screen shows a taskbar with various application icons and system status indicators.
